Photoshop/Illustrator

## Education

### Flatiron School

March 2021 – Dec 2021

Full Stack Web Development, Ruby  
on Rails & JavaScript program.

### University of Washington

2009 – 2014

Bachelor of Arts  
Architectural Design

Bachelor of Science  
Construction Management

Motivated full stack software developer with experience building full stack applications using React, JavaScript and Ruby on Rails. Eager to contribute to great teams and provide creative solutions. Ready to utilize 7+ years in construction management, bringing excellent problem solving, team building, project & time management skills. I also enjoy getting my hands dirty in the workshop building furniture, props, guitars, tabletop miniatures, or anything else that provides a challenge and opportunity to try new skills.

## Technical Projects

**Fallout CellMate** - [Github](#) - [Demo](#) - React, Redux, Rails API, Heroku  
Project Management App for Fallout Cascadia game development

- Deployed and currently in use by the Fallout Cascadia Dev Team
- ReactJS/Redux frontend & Rails API backend with PostgreSQL database
- Incorporated Discord OAuth2 server side user authentication & creation

**CyberBug** [Github](#) - [Demo](#) - React, Redux, JavaScript, Rails API, PostgreSQL  
Full Stack Application to create, manage, and resolve software bugs

- Utilized JSON Web Tokens with localStorage to store encrypted user data
- Created RESTful Rails API, ReactJS frontend with async fetch requests
- Implemented Redux for state management and API fetch requests
- Focus on best practices to create clean, DRY, & modular components.

**Who Are You?** - [Github](#) - [Demo](#) - JavaScript, Rails API, PostgreSQL, Heroku  
Questionnaire app to generate a character backstory for RPG games

- JavaScript frontend with RESTful Rails API backend
- Implemented asynchronous functions for API requests and animation.

## Experience

**Fallout Cascadia Dev. Team: Level Designer** June 2021 – Current

- Working with a multidisciplinary team to create a massive Fallout 4 mod.
- Responsible for level design using base and custom team created assets to generate a new Pacific Northwest based game world.

**Ferris-Turney: Sr. Project Engineer** August 2020 – Jun 2021

- Led multiple construction projects to completion on time and on budget
- Prepared budgets & schedules, evaluated vendor quotes & subcontracts
- Coordinated cost and time efficient constructibility solutions with team
- Overhauled submittal process and automated much of the data entry

**Swinerton Builders: Sr. Project Engineer** July 2016 – May 2020

- Estimating, procurement, scheduling & coordination with team members

**Stellar J Corporation: Project Engineer** June 2014 – July 2016

- Managed 3D & BIM modeling, created drawings and details
